

Alfa Laval SMP-BC

Double seal valves

Introduction

The Alfa Laval SMP-BC Mixproof Valve is a hygienic pneumatic double-seal valve that safely handles the simultaneous flow of two different products through the same valve without any risk of cross-contamination. Standardized and cost-effective, the top-loaded valve is designed for quick leakage detection to maximize product safety and low maintenance due to few moving parts. It is often used in Cleaning-in-Place (CIP) lines and can also be used in other systems handling products.

Application

The Alfa Laval SMP-BC Mixproof Valve is designed for hygienic applications that require additional safety, leakage detection and CIP in the dairy, food and beverage, personal care and many other industries.

Benefits

- Hygienic double-seal mixproof valve
- Versatile, modular design meets most hygienic application requirements
- Cost effective

Working principle

The Alfa Laval SMP-BC Mixproof Valve is controlled by means of compressed air from a remote location. The valve is fitted with two small pneumatic normally open (NO) valves, a detecting valve and a CIP valve. The valve plug has two seals, which form an atmospheric leakage chamber. Any product leakage is discharged through the detecting valve. The leakage chamber may be cleaned by supplying a CIP system into the detecting valve. The SMP-BC is insensitive to water hammer in the product line above the plug.

Standard design

The Alfa Laval SMP-BC Mixproof Valve consists of valve bodies, bonnet, plug and an actuator. Two versions are available: a shut-off valve with one valve body and a shut-off valve with two valve bodies. A plug clip system and clamp rings secure the valve bodies to the actuator. The valve can also be fitted with the Alfa Laval ThinkTop V50 and V70 for sensing and control of the valve.

TECHNICAL DATA

Pressure

Max. product pressure (depending on valve specifications):	1000 kPa (10 bar)
Min. product pressure:	Full vacuum
Air pressure:	500 to 800 kPa (5 to 8 bar)

Temperature

Temperature range:	-10°C to +140°C (EPDM)
--------------------	------------------------

ATEX

Classification	II 2 G D*
----------------	-----------

*This equipment is outside the scope of the directive 2014/34/EU and must not carry a separate CE marking according to the directive as the equipment has no own ignition source

PHYSICAL DATA

Material

Product wetted steel parts:	1.4401 (316L)
External surface finish	Semi-bright (blasted)
Internal surface finish	$Ra \leq 1.6 \mu m$
Optional:	Bright Polished $Ra \leq 0.8 \mu m$
Other steel parts:	1.4301 (304)
Product wetted seals:	EPDM (optional: NBR, FPM)
Other seals:	NBR

Valve body combination

Type 20 and 30 body versions are on request available in following configurations:

- Tee welded on lower port in 0 or 90 deg. version. Type: 21 and 22
- Bend welded on lower port in 0, 90, 180 or 270 deg. version. Type: 11 and 12

Options

- A. Male parts or clamp liners in accordance with required standard.
- B. Control and Indication: ThinkTop V50 and V70, IndiTop.
- C. Actuator with stronger spring.
- D. Larger actuator for valve sizes 38-51 mm/DN40-50.
- E. CIP installation kits.
- F. Other valve body combinations.
- G. Service tools for actuator.
- H. Tool for plug seals (Necessary for changing the seals).

Note!

For further details, see also instruction manual ESE02255.

Air consumption (litres free air) for one stroke

Size	38-51 mm DN 40-50	63.5101.6 mm DN 65100	DN 125-150	DN 125-150
Stop valve	0.2 x air pressure (bar)	0.7 x air pressure (bar)	1.5 x air pressure (bar)	2.2 x air pressure (bar)
Actuator function	NC	NC	NC	NC
Stop valve			3.6 x air pressure (bar)	2.9 x air pressure (bar)
Actuator function			NC (Support air for closing)	NC (Support air for opening)

Operation/cleaning

a. Closed shut-off valve:
Cleaning of the leakage
chamber.

b. Open shut-off valve
a. Cleaning of the valve body and
the leakage chamber.

Air Connections Compressed air:

R 1/8" (BSP), internal thread.

CIP connection:

R 3/8" (BSP), external thread.

Leakage connection:

R 3/8" (BSP), external thread.

Caution, opening/closing time:

Opening/closing time will be affected by the following:

- The air supply (air pressure).
- The length and dimensions of the air hoses.
- Number of valves connected to the same air hose.
- Use of single solenoid valve for serial connected air actuator functions.
- Product pressure.

Alfa Laval reserves the right to change specifications without prior notification.
