

Our brands

The best brand does not exist. Intended use, circumstances, connections, certifications, costs, environmental aspects as well as service and maintenance requirements are all aspects that make a specific brand the right choice in a specific context. It is not about the best brand, it is all about the best choice. SKS is happy to assist you in making the right choice - please contact us for advice. Each of the following is a top international brand, available from SKS.

About SKS

Who we are, what we do and what we are aiming at

Since 1994, SKS has been a household name in the niche market of the food and pharmaceutical industry. The company started as an engineering and installation specialist in this market. Based on a strong demand for directly available standardized and suitable process components, spare parts and installation materials, a balanced and complete delivery programme was set up for the food and pharmaceutical industry.

Its strengths are the enormous number of items in stock, the diversity in brands and options of high-quality equipment, the response time and flexibility and the safe and efficient way of packaging and dispatch. This allows us to provide goods for new installations and maintenance purposes and to deliver spare parts quickly.

As a market-leader, we want to stay ahead of other companies and that is why we offer a state-of-the-art on-line shopping site next to the regular off-line sales outlets. In this digital environment, you can find all information you need about our product range, 24/7. The shopping site offers easy access to a vast technical database for everyone and placing orders or requests is dead easy.

Our customers from all over the world do not see us as just a supplier of components, but as a specialized sparring partner and advisor on designing specific and often complex production lines, not least because our society and the authorities are setting increasingly high demands on safety, environmental aspects and sustainability. We are happy to assist you in adapting your processes to those changes.

We face the future with confidence because of our experience and we are inspired by the ever-changing world. We from SKS are not just a supplier of components, but also a supplier of knowledge, ideas and solution, allowing the food and pharmaceutical industry to produce in an efficient and responsible way. For present and future generations.

SKS – We know your process flow
